J

JOURNAL

Modern official electronic journal for US notaries.

 Watch **demo** in action

THE PRODUCT

BlockNotary Journal replaces the paper notary journal for recording notary acts. It works on mobile and web platforms, is easy to use, and is built on distributed trust. When notaries put their acts in Journal, they can trust they're secure with end-to-end encryption, and their data is their own. The blockchain protects authenticity and timestamp for each notary act.

| | PAPER JOURNAL | ELECTRONIC JOURNAL | BLOCKNOTARY JOURNAL |

NOTARY ACTS

Browse a list of your notary acts. Visit <https://journal.blocknotary.com> to view, edit, print, and email your entries.

PROTECTION

Each notary act is protected by end-to-end encryption and blockchain notarization.

ADD ENTRY

An easy way to record acts with each state's specific entry fields and barcode scanning.

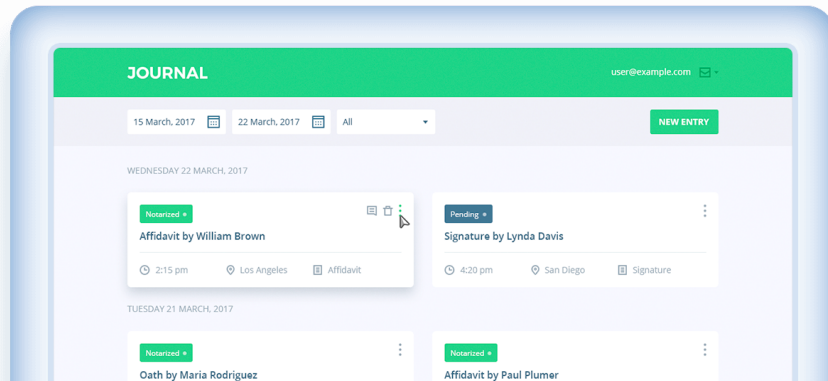

SIGN ON DEVICE

Sign on a device to receive proof of the physical presence and identity of parties whose signatures have been notarized.

DASHBOARD

Blocknotary Journal provides a web version as a part of the system. You can create and manage notary acts created from web and mobile versions of the system. You can edit, print, and email your entries.

H.868 (Act 157)

Sec. 1.1: Blockchain Technology (effective July 1, 2016) creates rebuttable statutory presumptions of authenticity for records using blockchain technology.

BLOCKCHAIN ENABLING LAW

Verification and authentication are two of the benefits you get with BlockNotary products, because they're blockchain enabled. And now that governments are recognizing the blockchain, BlockNotary technology can even help in legal situations.
