

## UNSTOPPABLE APPLICATIONS

Oracles Network supports multiple types of decentralized applications (DApps): decentralized applications for launch and governance of validators on Oracle Network, decentralized oracles for sovereign identity, decentralized applications for network management. You can participate in the development of new decentralized applications for bounties and respect.

### ORACLES NETWORK DAPPS

#### CEREMONY LIVE

DApp to replace initial key to a set of keys, generated by validator and replace them in a validator contract.

[→ RUN APP](#) [</> SOURCE CODE](#)

#### GOVERNANCE LIVE

DApp for governance and managing a list of validators. Validators can propose ballots and vote for changes in the list.

[→ RUN APP](#) [</> SOURCE CODE](#)

#### VALIDATORS LIVE

DApp to get a list of current validators with their personal information.

[→ RUN APP](#) [</> SOURCE CODE](#)

### MANAGEMENT DAPPS

**NETWORK STATS** LIVE

Network stats DApp for Oracles Network.

[→ RUN APP](#)

**BLOCKCHAIN EXPLORER** LIVE

Blockchain Explorer for Oracles Network.

[→ RUN APP](#) [</> SOURCE CODE](#)

**ORACLES METAMASK** LIVE

A fork of Metamask Chrome plugin for Oracles Network.

[→ INSTALL APP](#) [</> SOURCE CODE](#)

**FAUCET** LIVE

Get free ether for Oracles Dev Testnet (0xC0FFEE)

[→ RUN APP](#) [</> SOURCE CODE](#)

**ICO DAPPS****ICO WIZARD DAPP** IN PROGRESS

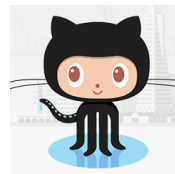

DApp for end-to-end serverless and trustless ICO campaigns

[→ RUN APP](#) [</> SOURCE CODE](#)

**IDENTITY DAPPS****PROOF OF PHONE** LIVE

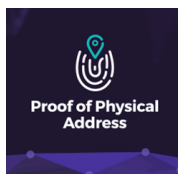

DApp to proof ownership of a phone number and link it with a wallet on an ethereum network.

[→ RUN APP](#) [</> SOURCE CODE](#)

**PROOF OF GITHUB** LIVE
