SHA512_256   `val SHA512_256: DLSequence`
                    SPHINCS-256 hash-based signature scheme. It provides 128bit
                    security against post-quantum attackers at the cost of larger key
                    sizes and loss of compatibility.

SPHINCS256_SHA256   `val SPHINCS256_SHA256: SignatureScheme`
